Questions about

A Trust Fund That Cannot Shrink No. 4-What interest will it earn?

Quite as much as the average earnings of trust funds and meanwhile it is all guaran teed against any default. Mortgages guaranteed by the Bond and Mortgage Guarantee Company have carned during the past thirty years a little more than Municipal or othe savings bank bonds purchased at the same period and the principal and interest have always been paid in full

The rate is adjusted to the market ever three or five years when the mortgages mature and the principal can be collected in full at any maturity date.

The trouble with long term bonds is that they fluctuate in price. It is better to get the current rate for money and have no fluctuations in price.
